Energy Star

In order to meet the "Cool Roof" or "Energy Star" criteria the following must be true. On steep slopes (3/12 pitch or greater) the initial SSR value must be (0.250) or greater and the 3yr reflectivity must be (0.15) or greater. For low slopes roofs less than a (3/12 pitch) the initial SSR value must be (0.65) or greater and the 3yr reflectivity must be (0.50) or greater.

The table below shows the SSR value for the Baker Metal Works & Supply color chart. The **BOLD** colors meet the cool roof rating for steep slopes.

Color	Color Code	SSR Value
Berry	SPR0437X	0.33
Black	SPA0670X	DNQ
Bone White	PMW2699	0.56
Bronze	SPB0548X	0.28
Clay	SPD0457X	0.37
Cocoa Brown	SPB0511X	0.27
Copper Metallic	439Z637M	0.49
Galvalume	ZINC/ALUM	0.68
Green	SPG0517X	0.34
Hawaiian Blue	SPL0342X	0.32
Ivory	SPD0443X	0.61
Light Brown	SPB0546X	0.31
Light Gray	SPA0397X	0.42
Light Stone	SPD0403X	0.51
Marina Blue	SPL0461X	0.27
Patina Green	SPG0387X	0.39
Red	SPR0282X	0.28
Sand White	PMW0238	0.54
Shadow Gray	SPA0610X	0.29
Tan	SPD0405X	0.41
